MRN: 12345678

Adm No: SP2011-18

Address: 123 BRUTON SMITH AVENUE
HICKORY, NC 28601

Physician: Dr. Gaa Richardson

DOB: 1/1/1976 (Age: 35)

Gender: M

Race: O

Add'l Phy: Dr Sean Larson

Accession No: **SP11-18**

Collected: 8/4/2011

Received: 8/4/2011

Reported: 9/8/2011

DIAGNOSIS

A. BIOPSIES OF ESOPHAGUS AT 42 CM:

INTESTINAL METAPLASIA (BARRETT'S ESOPHAGUS).

B. BIOPSIES OF ESOPHAGUS AT 40 CM:

**INTESTINAL METAPLASIA (BARRETT'S ESOPHAGUS), WITH FOCAL HIGH GRADE
DYSPLASIA.**

DIAGNOSIS COMMENT

Seen in consultation with Dr. Payne, who agrees.

*****Electronically Signed Out By Ryan Little*****

Dr Kerry D Payne

PERTINENT CLINICAL INFORMATION

BARRETT'S ESOPHAGUS

TISSUE SUBMITTED AND GROSS DESCRIPTION

A. BIOPSIES OF ESOPHAGUS AT 42 CM: Multiple fragments of tissue, 0.1 to 0.2 cm. TS-1.

B. BIOPSIES OF ESOPHAGUS AT 40 CM: Multiple fragments of tissue, 0.1 to 0.2 cm. TS-1. WLM/jdf

MICROSCOPIC DESCRIPTION

Sections of the 42 cm esophageal biopsy shows focal intestinal metaplasia. The process is fairly mature without evidence of dysplasia. However, at 40 cm, there is a fragment of mucosa that is frankly dysplastic, with nuclear pleomorphism and hyperchromasia, extending out to the surface, appearing unrelated to any inflammatory process.
